ABOUT ME

I learned web development on my own, from the best online resources. I've been working on web development projects continuously for the past three months, and during that time, I've created ten projects on my own. This has greatly increased my practical knowledge with HTML, CSS, JavaScript, Tailwind, ReactJS, NextJS, expressjs, and NodeJS. I'm now seeking for an opportunity to work with other talented people to further expertise my skills.

RELEVANT PROJECTS

- [Portfolio site](#)
- [Quiztime](#) - javaScript mock test website
- [Streamflowzz](#) - music streaming site
